Standard Incentives

Evergy offers a wide range of incentives designed to help our Kansas business customers achieve energy savings by reducing the upfront cost of installations. Our Standard Incentives provide savings for energy-efficient equipment upgrades on a one-for-one basis, making it quick and easy to save money and energy. For projects with an anticipated incentive amount of \$15,000 or less, simply apply after equipment purchase and installation to receive a fast incentive check. For projects expecting an incentive greater than \$15,000, pre-approval must be obtained before equipment purchase. Small business and non-profit organizations may be eligible for improved incentive rates. Discuss with your Efficiency Outreach Associate.

Custom Lite Incentives

Custom Lite incentives take the guesswork out of how much your project qualifies for and are processed like a custom incentive on the back end without the need to submit calculations! Pre-approval is not required for Lighting Custom Lite measures if project incentive is under \$15,000. All Custom Lite HVAC measures require pre-approval with submission of pictures of existing equipment, including a legible nameplate picture.

Custom Lite HVAC

Custom Lite HVAC qualification for incentive is based on incremental cost over that of a baseline unit.
